SOURCEWATER PROTECTION PLAN IMPLEMENTATION EVALUATION REPORT

4/30/2024 EVALUATION COMPLETED

City of New Germany, Minnesota

SOURCEWATER PROTECTION PLAN IMPLEMENTATION EVALUATION REPORT

Date of Initial Plan Approval—August 16, 2018

Evaluation Completed By— Twyla Menth, Lee Orloff,

Plan Evaluation Frequency— April 30, 2023

Submit Copies of the Report To:

Trudi Witkowski, Sourcewater Protection Unit Compliance

CONTENTS

I. Changes to Water System, Delineations, or Contaminant Sources	1
A. List the unique number and locations of new or sealed municipal wells or other high capacity wells installed since the last Plan evaluation:	1
B. List any changed land use activities or new facilities in the DWSMA(s) of concern to the sourcewater quality or quantity:	1
II. Sourcewater Protection Plan Evaluation Approach	1
A. Documentation of potential contaminant sources	1
B. Documentation of SWP Plan measure implementation activities	1
III. Recently Acquired Data or Issues That May Be Related to Future Delineations or Sourcewater Management	2
IV. Projected 2-Year SWP Plan Implementation Work Plan	2
A. Municipal Well Inner Wellhead Management Zone (IWMZ) Surveys.....	2
B. Water Supply Emergency and Contingency Plan.....	3
C. SWP Plan Measure Implementation 2-Year Work Plan.....	3

I. Changes to Water System, Delineations, or Contaminant Sources

A. List the unique number and locations of new or sealed municipal wells or other high capacity wells installed since the last Plan evaluation:

Table 1 – New or Sealed Municipal or Other High Capacity Wells in DWSMA

Well Unique Number	Date Online or Sealed	Delineation Completed (Y or N)

B. List any changed land use activities or new facilities in the DWSMA(s) of concern to the sourcewater quality or quantity:

Table 2 – New Land Use or Facilities of Concern in DWSMA

Name of Facility	Address	Date of Change	Sourcewater Concern

II. Sourcewater Protection Plan Evaluation Approach

A. Documentation of potential contaminant sources

1. How is the potential contaminant source inventory data in the SWP Plan maintained?
2. At what frequency is the potential contaminant source inventory data reviewed and updated?
3. What notable changes have occurred to the potential contaminant source inventory data since the last Plan evaluation?

B. Documentation of SWP Plan measure implementation activities

Table 3 - SWP Plan Measures Implemented

SWP Plan Measure Number	Action	Date Implemented	Implementation Partner(s)	Was Project SWP Grant Funded?

III. Recently Acquired Data or Issues That May Be Related to Future Delineations or Sourcewater Management

Table 4 – Newly Acquired Data or Issues Related to Future Sourcewater Efforts

Nature of Data	Source of Data	Relation to Sourcewater Plan

(Examples for new data or issues may include groundwater study results, water quality monitoring data, well construction logs, land use change documentation, etc... These changes may be used during a future SWP Plan amendment.)

IV. Projected 2-Year SWP Plan Implementation Work Plan

A. Municipal Well Inner Wellhead Management Zone (IWMZ) Surveys

1. Review and update the IWMZ surveys for all primary and emergency wells.
2. Review recommendations for potential contamination sources located within the IWMZ and indicate priority actions for implementation.

B. Water Supply Emergency and Contingency Plan

1. Update information in the Plan related to the water system and contact information.
2. Identify needs that are associated with providing a safe and reliable drinking water.

C. SWP Plan Measure Implementation 2-Year Work Plan

The SWP Team has prioritized the following management strategies from the Plan to be completed or addressed over the next 2 years.

Table 5 – Projected SWP Plan Measures for Implementation

SWP Plan Measure Number	Measure Action	Anticipated Implementation Cooperators or Partners	Potential MDH SWP Grant Project? (Y or N)
